Overview of a potential scheme for geointelligence applied to Customs.

© Thomas Cantens WCO Research Unit 2019

Data collection

- Customs Units Reports
- Public Projects: Localities, roads, paths, boundaries
- Spatial Agencies: Satellite imagery (landcover, elevation...)
- Universities ACLED*: Geolocated incidents
- International Organizations: Economic and humanitarian data
- National Partners: Reports analysis
- IT Customs Clearance Systems: Trade data

Fusion and analysis

- Analysis tools based on open source software

Intelligence dissemination

- Operation maps
- Suspicious areas
- Anomalies
- Porous border areas
- Situational picture
- Modeling trade & crisis
- Policy analysis

* Armed conflict location & event data
